SAFETY TIPS

- PROTECT YOUR HEAD**
Wear a properly fitted bicycle helmet.
- STAY VISIBLE**
If drivers can see you, they're less likely to hit you. Wear bright clothing, even during the daytime. Use lights and reflectors when biking at night or in low-light conditions.
- STAY ALERT**
Keep a watchful eye for obstacles.
- LOOK, SIGNAL AND LOOK AGAIN**
Use hand signals to let drivers and other cyclists know where you're going. Look and make eye contact when you can. Don't assume that drivers will stop.
- OBEY TRAFFIC SIGNALS & SIGNS**
As a vehicle, bicyclists must obey all the rules of the road. When you ride in the street, obey all traffic signs, signals and lane markings.
- ALWAYS RIDE WITH TRAFFIC**
Ride in the same direction as other vehicles.
- RIDE TO THE RIGHT**
Ride as far to the right as possible, but stay far enough away from the curb to avoid hazards. Ride in a straight line at least three feet away from the curb to allow room for moving around road hazards. Watch for cars entering from driveways.
- CHANGING LANES**
To change lanes, look behind you for traffic and signal first. Traffic in the lane you want to move into has the right of way. Look back and wait for an opening in traffic before moving over.
- SCAN THE ROAD AHEAD**
At intersections, watch for turning cars and pedestrians. When mid-block, watch for cars pulling out of driveways, alleys and parking spaces. Make eye contact with other drivers when possible. Yield the right of way to pedestrians in crosswalks.
